### **Task information: Practical Examination**

The **practical exam** will test your skills in manipulating scientific equipment to measure and observe. Your active participation in class practical tasks has allowed you to practise these skills.

The exam consists of 5 stations, each with its own task to perform. You will have 3 minutes to complete each station.

### **Equipment:**

The equipment required for this task is – pen, pencil, ruler, eraser, calculator.

**No borrowing of equipment (from the teacher or other students) will be permitted in the exam.**

### **Absence:**

Procedures for absence are outlined in your assessment booklet.

Any student who arrives late to their appointed exam room, for the practical exam, will be admitted but **NO** extra time will be given.
